V0901 LOW BIRTH WEIGHT STATUS VERSUS LOW BIRTH WEIGHTS
- New 1/1/02

Guideline: Status codes are to be used for patients who no longer have the initial condition, but may continue to manifest the consequences of it. Coding Clinic instructs that if a patient has a condition classifiable to the perinatal chapter (codes 760-779), it should be coded and these status V codes should not be used. Both the low birth weight status and low birth weights should not be used together.

V0901 Exclusive check (if match, error) – Y438

Diagnosis Table	V21.3x	Low birth weight status
Relational Table	764.xx	Slow fetal growth and fetal malnutrition

V0901 Exclusive check (if match, error) – Y439

Diagnosis Table	V21.3x	Low birth weight status
Relational Table	765.xx	Disorders relating to short gestation and low birth weight

V0902 POST-TERM PREGNANCY (40-42 weeks) VERSUS PROLONGED PREGNANCY (greater than 42 weeks) – New 1-1-02

Guideline: Women who are between 40-42 weeks of pregnancy are considered post-term, if diagnosed by the physician. Women who are past 42 weeks of pregnancy are considered prolonged pregnancy, if diagnosed by the physician. It is illogical to report codes for both the post-term pregnancy and prolonged pregnancy.

V0902 Exclusive check (if match, error) – O017

Diagnosis Table	645.1x	Post-term pregnancy (40-42 weeks)
Relational Table	645.2x	Prolonged pregnancy (greater than 42 weeks)
